Xtreme Motorsports International to Unveil Environmentally Friendly Hydrogen Hybrid XYB-400 - Tuesday, Mar. 17, 2009

Xtreme Green Launch in 2009 HENDERSON, Nev., March 17 /PRNewswire/ -- Xtreme Motorsports International, Inc. (Pink Sheets: XTMM), through its wholly owned subsidiary, YamaBuggy Sales & Distribution, Inc., is pleased to announce that in conjunction with Quicksand Performance the all new Hydrogen Hybrid XYB-400 Side X Side will be unveiled to select Dealers and Investors in Newport Beach, CA on Friday, March 20, 2009.

The all new XYB-400 will feature a Hydrogen System designed by Hydrogen Hybrid Corp. (Pink Sheets: HYDB) and is designed to improve mileage, and further reduce emissions. The company is in final stages of EPA testing, and expects to receive confirmation on the XYB-400 passing both the EPA and CARB standards without the Hydrogen System by early May 2009. "We anticipate there will be a tremendous interest in our development towards a 'Greener' off-road vehicle and using Hydrogen Systems initially will provide a very efficient and cost effective solution. In addition we are researching and developing an all electric version which will be added into the Xtreme Green lineup," stated Walt Tatum, Chairman of the Board.

"In February we announced The XYB-1300, which was unveiled at the Dealer Expo in Indianapolis, and now we are demonstrating our move into the Xtreme Green phase which has been in the planning and development stages since we decided to build the Brand and develop specific levels of performance to meet our 'Mild to Wild' mix of vehicles. We introduced the smaller 400 CC Buggy first, and in February we introduced the 1300 CC powerhouse, and soon we are going to fill in the offering with a mid 600 - 700 CC vehicle, rounding out our XYB series," stated Omar Deen, President of Quicksand Performance.

Mr. Tatum added, "The decision to adapt our vehicles to a 'Green' standard has been our vision from the moment we acquired the exclusive distribution rights for North America. We knew we wanted to go 'Green', and we knew technology existed to help us get there, but our initial focus was perfecting the design and ergonomics of the vehicle, and introducing the different levels of power and performance. Now we are ready to move forward and do our part in making off-road enthusiasts aware of the positive environmental choices they can make."
